

BROOKFIELD GLOBAL BUSINESS ADVISOR LIMITED

UK GHG EMISSIONS AND ENERGY USE DATA FOR PERIOD 1 JANUARY 2022 TO 31 DECEMBER 2022

3	Business travel in employee-owned vehicles where Company is responsible for purchasing the fuel	1.0	0.4

Total * 527.5 [ons04 (el)10 ()]0. (E97l.(1) (Sc (el993ch)0.625 (y)-3.0059 n)47.261(o)-5 (wn, S (el)80 -c)0.

Intensity ratio (33 FTEs) (2022/23 FTEs)

tCo2e per FTE

Intensity Ratio	2022	2021
Reporting Boundary / by full time employees (location t based) (Scope 1, Scope 2, and Scope 3)	0.44	0.54

Boundary, Methodology and Exclusions

An Operational control approach has been used to define the Greenhouse Gas emissions boundary. An operational control approach to GHG emissions boundary is where an organisation has operational control over an operation if it, or one of its subsidiaries, has the full authority to introduce and implement its operating policies at the operation. This approach captures emissions associated with the operation of the office space occupied.

The Company has used the GHG Protocol Corporate Accounting and Reporting Standard (Revised Edition) as the method to quantify and report greenhouse gas emissions. This information was collected and reported in line with the methodology set out in the UK Government's GHG Reporting Guidelines, 2019. Emissions have been calculated using the latest conversion factors provided by the UK Government. There are no material omissions from the mandatory reporting scope.

Energy Efficiency Initiatives

The Company already benefits from built energy efficient measures such as LED lighting and as a result, no specific measures were implemented during the reporting year. In addition, all electricity is procured from REGO backed renewable sources. The Company will continue to review measures it has in place to ensure it reduces its energy consumption and carbon emissions.

UK GHG EMISSIONS AND ENERGY USE DATA FOR PERIOD 1 JANUARY 2022 TO 31 DECEMBER 2022

Summary

This report covers UK operations only as required by The Companies Act 2006 (Strategic Report and Directors' Report) and Limited Liability Partnerships (Energy and Carbon Report) Regulations 2018; the latter commonly referred to as Streamlined Energy & Carbon Reporting (SECR) for non-quoted large companies.

The Company's greenhouse gas emissions, reportable in SECR financial year ended 31 December 2022 was 13.5 tonnes CO₂e (2021 10 tonnes CO₂e) using the location-based methodology. Location-based reporting does not take into account the electricity supply contracts a company has and instead uses a national carbon emissions factor for electricity. The Company's energy consumption reportable under SECR in 2022 was 998.9 MWh (2021 919.9 MWh).
